SUMMARY

Product-minded B2B professional on the Uffizio marketplace team: took a fleet-telematics marketplace from customer complaints and discovery calls to a self-initiated PRD, clickable prototype and shipped release, then iterated on search, checkout and support after launch. Onboarded 50+ system integrators and helped close an INR 60 lakh (~$70K) deal. 4 years of customer-facing B2B experience across US, EMEA and APAC markets. Completed the Airtribe AI-First PM Program (2026); capstone built on 19 customer interviews.

EXPERIENCE

Uffizio, Business Development Executive (Marketplace Team; self-initiated product work) | India, Remote | Apr 2026 - Present

- Discovery: reviewed customer complaints, support tickets and discovery calls with system integrators and fleet operators; found recurring gaps in warranty tracking, value proposition, search, trust and checkout.
- Wrote a PRD on my own initiative: 12 prioritized requirements (P0/P1), user stories, acceptance criteria, business rules, risks and success metrics, with a 2-week baseline set before targets.
- Built the first clickable prototype; the UI team used it as the reference for the final design (advanced search, Verified filter, list/card views, GST-ready checkout), which shipped to customers.
- Post-launch iteration: UI refresh, AI search, improved advanced search and a WhatsApp support bot; now scoping a warranty-tracking module and aligning ordering, FASTag and payment workflows with the Bosch backend team and banking partners, guiding ground-level requirements from the Uffizio side.
- Go-to-market: onboarded 50+ system integrators through partner discovery calls and demos, and helped the 3-person team close an INR 60 lakh (~$70K) deal.
- Used post-launch customer feedback to prioritize the roadmap.

Business Development Manager, Mobility Foresights (Market Research) | Remote | Oct 2024 - Jan 2025

- Closed 17 enterprise deals ($58K) and built a $324.6K pipeline with senior stakeholders across the US, EMEA and APAC; reached 98% of quota through renewals and expansion.
- Managed a Fortune 1000 account portfolio (Sony, Samsung, Hitachi, Siemens) by researching accounts and multi-threading into C-level stakeholders.

Assistant Manager, Corporate Sales, 99acres.com (Info Edge) | Nov 2023 - Jun 2024

- Restructured the discovery process, raising quarterly quota attainment from 78% to 108%; won 30+ new B2B logos by mapping product packages to customer use cases. Tracked pipeline, leads and forecasts in HubSpot.

Business Development Associate, BYJU'S | Nov 2022 - Aug 2023

- Turned recurring customer objections into a sales enablement playbook; raised quarterly quota attainment from 58% to 92% and generated INR 29 lakh in closed revenue.

PRODUCT PROJECTS (AIRTRIBE AI-FIRST PM, 2026: 9 MENTOR-REVIEWED CASE STUDIES)

Commitment Cards: Fireflies.ai capstone | Individual, 14 days | Oct 2026

- Problem: Fireflies extracts meeting commitments but sends them as a broadcast email with no owner, due date or status; only 28% reach a resolved state in 14 days (target: 45% in 6 months).
- Research: 19 recorded interviews across 3 companies (sales reps, team leads, founders); tested Fireflies hands-on on a real client call; found visibility was the top breakage (8 of 19).
- Solution: designed a card per commitment with owner consent, "Waiting on" tag, blocked button and one daily digest; prioritized 14 ideas with RICE and documented what not to build. North Star: 14-day resolution rate, with guardrails. Delivered PRD, 17-slide deck and a 6-screen interactive prototype (concept only, no live pilot).

VitaFit retention strategy: traced a day 14-21 drop-off to 2 root causes; wrote a PRD for streak recovery with a 5% beta rollout, 6-week A/B test and ship/no-ship criteria.

Zomato funnel analysis: mapped a 7-stage ordering funnel, ranked fixes by impact vs effort and proposed a North Star metric tree linking 8 initiatives.

SKILLS

Product: discovery and customer interviews, PRDs, user stories, acceptance criteria, RICE/MoSCoW prioritization, prototyping (Figma, Lovable), success metrics, A/B testing, UAT, Agile/Scrum
Data and tools: SQL, Mixpanel, Google Analytics, Excel/Google Sheets, Jira, Confluence, Notion, HubSpot
AI: Claude, Claude Code, ChatGPT, Gemini, n8n, prompt engineering, AI-assisted workflows, AI search and chatbot features

EDUCATION

AI-First Product Manager Program, Airtribe | Jul - Oct 2026
Bachelor of Business Administration (Marketing), Parul University, India | 2019 - 2022
